

ABOUT THE PROJECT

The project **GoGreen – Using Augmented Reality Technology and Simulation-Based Training to Foster Green Economy**, is a project focusing on developing the skills and competences of VET providers to support the professional development of the private sector stakeholders and entrepreneurs and those willing to effectively support Green Economy through the development of a tailored VET green curriculum based on augmented reality technology, simulation training and an innovative Massive Open Online Course.

The project brings together a partnership of experts in the field from Cyprus, Greece, Spain, Ireland, Italy and Czech Republic. Stay tuned for some engaging and interesting actions coming up!

GoGreen KICK-OFF MEETING

GoGreen partners met online at the 8th of January 2021 for the kick-off meeting of the project. At the meeting, partners defined the expected project results and the target groups of the project and introduced the outputs and the initial steps.

GoGreen PARTNERS MEET ONLINE

On the 6th of May, partners of the GoGreen project met online and discussed the contribution each partner will have in the project. The key subject of the meeting was the presentation of the needs of the VET providers/educators, participating in the survey and discussed the timeframe of the outputs. Also, the partners discussed the start of IO1 with the curriculum to advance VET providers/trainers skills, key competences about climate change issues and to provide them with the necessary tools.
