

Press Release

November 28th and 30th ITC hosted Multiplier events bringing together face to face with online participation people and experts from wide different areas like SME owners, business consultants, entrepreneurs and VET/University teachers and students.

ITC presented to the participants the main results of the project:

- Output 1: VET Green Curriculum using Augmented Reality Technology
- Output 2: Simulation-based training package
- Output 3: Massive Open Online Course (MOOC) for climate action
- Output 4: Toolkit with Policy & Practice Recommendations.

We made together a short and simplified version of GoGreen simulation-based training. The role-play training format was first time for several participants but it was considered very interesting as a holistic way of learning, not only knowledge but skills, and most of the participants were very active in the discussions and debriefing.

For any other information, visit our website at www.gogreen-project.eu and follow us on Facebook @GoGreenProjectEU to stay up-to-date with the project's news, activities, progress and announcements.
