

## Toolkit with Policy & Practice Recommendations:

The Output 4: *Toolkit with Policy & Practice Recommendations* is prepared, and includes a collection of lessons learned, good examples and practices, challenges and policy recommendations. The final report can be downloaded through the GoGreen project website. The Toolkit presents findings from a consultation that was undertaken with VET providers who participated in the project in each country, and project partners who have been engaged in the project from the beginning.

## Final Translational Partners Meeting in Nicosia, Cyprus:

The GoGreen partners met in **Nicosia, Cyprus on the 9<sup>th</sup> of November** for the last Translational Partners Meeting. Being the only and last face-to-face of the partnership and with the activities of the project coming to an end, partners explicitly discussed all the part of the project. KES College as the leading partner with the support of CARDET welcomed the participants and thanked the partnership for the constructive collaboration thus far in the project. Following each of the outputs were presented along with clarifying any pending tasks on behalf of any partner. Each partner presented the Output that they were responsible and gave updates on any pending tasks. After the short break, separate sessions took place for the Quality Assurance & Impact, Dissemination, Exploitation-Sustainability. For each section, the leader left time for partners to raise any concerns or ask for any clarifications. The involvement of all partners during all discussions was evident during the meeting and a collaborative spirit was promoted.

## Final Conference in Nicosia, Cyprus

KES College, with the support of CARDET, organised the Final Conference of the GoGreen project on the 10th of November 2022, in Nicosia, Cyprus. The participants at the conference were mainly VET and adult educators, people from the academic sector and business owners. The event was held on a hybrid mode. The objective of the event was to present the outputs and results of the project and engage the target groups with the resources that were developed during the project. During the meeting a key note speaker and young business owner presented the journey of his start-up and the different stages that went through. Then an open discussion session followed, with all partners presenting the situation of climate change in their country. With the finalization of the presentations, the participants were involved in discussions related to climate change and how the GoGreen resources can be used to their personal and professional life. The participants were very enthusiastic about the resources and that everything is available for free on the eLearning platform. The VET educators commented that the material will definitely be useful for their trainings with business owners. Participants from the academic sector commented that they gained new knowledge about climate change and that will visit the eLearning platform to practice the online courses. Business owners congratulate the consortium for doing such a great work with the resources and said that they are very interested in participating to a training and use the material to gain more knowledge on how their businesses can become greener and more sustainable.
